COMM-CORE® *surveillance*

Nationwide Professional Surveillance and Security Installation Network

Comm-Core's nationwide, professional surveillance and security installation network focuses on the deployment of IP-based surveillance and physical security solutions. Our technical expertise with seasoned management practices guarantees precise delivery on a national scale.

Over 5000 professional surveillance and security installers nationwide.

We provide installation, service work, special projects, technical support and ongoing maintenance.

We protect our clients and ourselves through our partnership with Compliance Management Solutions (CMS). Regulatory and compliance requirements vary per state and failure to comply with these requirements may result in stiff penalties. Comm-Core protects you, the client, by ensuring our installers are properly licensed and insured at each State and Local level.

Our Professional Installer Best Practices Include:

- **Comprehensive installer policies**
- **Verification of licensure and insurance**
- **Installer approval procedure**
- **Approved installer list**

- **Management of document expirations, advance notification and removal of licensed installers if they are no longer compliant**
- **MSAs for all installers that outline insurance and licensing requirements**

Why Comm-Core?

Comm-Core believes the delivery of projects on time, to specification and within budget, is key to success. In doing so, the value to our client is peace of mind that whatever is required to ensure success is available and applied as necessary.
